LEANability

true business agility with flight levels

Certificate of Participation

Flight Levels

A Flight Levels Academy training.

Clifford Hazell

...has successfully completed the training "Flight Levels".

In this training, the participants learn how to manage business agility in the entire organization without falling into the trap of local suboptimization of teams. Based on the corporate strategy, the work systems to be developed are defined, how to connect these systems on different flight levels with each other and which agile interactions are required, so the company can operate agile on the market.
